# pp woven bag

## pp woven bag

Produced from woven polypropylene, it is environmentally friendly and reusable, adapting to a wide range of bale and transport environments.

## Customieed woven bags

our products all details can customized (size, weight, sewing, cutting, color, printing, quality)

## Application Scenario

Applied to food packaging, vegetable and other agricultural product packaging, daily necessities, geotechnical engineering, and tourism transportation

Width	35-100 cm
Length	Optional
Weight	55-160 gr/m <sup>2</sup>
Denier	Optional
Additives	Optional
Treat	UV treated or as the customers' requirement
Top	Heat cut or hemmed
Printing	One side or both sides in multi-colors with film or non film
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Colour	Optional
Packing	Optional (Bale Press Packing & Palletized Packing)
Bag Types	Transparent, Gusseted, Handle, PE Inner (PP+PE), Perforated, Valve

# BOPP WOVEN BAG

## BOPP/OPP Bag

These are bags produced by laminating high resolution OPP films to the bag fabrics. They are preferred for the purpose of increasing their visibility by highlighting their visuals with OPP films.

Width	35-100 cm
Length	Optional
Weight	55-160 gr/m <sup>2</sup>
Denier	600-1500D
Additives	Optional
BOPP/OPP	20-50 gr/m <sup>2</sup>
Cutting	Optional
Printing	Up to 8 Colors on One or Both Sides
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Colour	Optional
Packing	Optional (Bale Press Packing & Palletized Packing)

(BOPP: Biaxially Oriented Polypropylene)

## Valve Woven Bag

Valve Woven PP Bags are sacks which produced in order to facilitate the filling of the products into the bag and closing the bag after filling. It is ensured that the bags are automatically closed with the valve on the mouth of the bag after filling.

## Normal

- Printed Bags
- No Valve
- No Side Gussets
- Custom Size
- Custom Logo

## Woven Bag With Side Gussets

The threads produced as polypropylene or polyester are preferred for the aim of completing the packing after packaging process. Production of desired number of turns is provided.

# Laminated Woven PP Bags

Laminated woven bags are made of high-quality polypropylene material. After the woven bag is coated, the presence of a plastic layer can prevent the ingress or exudation of water, providing a good sealing effect. For example, for bags filled with putty powder, it is necessary to apply a film to prevent the entry of water, complete the sealing work of the woven bag, and avoid moisture. In case of rain, it will not cause damage to the goods, and it can also prevent the goods from leaking out of the gap.

Width	35-100 cm
Length	As the customers' requirements
Weight	45-250 gr/m <sup>2</sup>
Denier	600D-1500D
Color	All kinds of colors or As the customers' requirements
Top	Heat cut or hemmed
Cut	Cold Cutting
Printing	One side or both sides in multi-colors with film or non film
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Surface Dealing	Anti-slip or Plain
Packing	Optional (Bale Press Packing & Palletized Packing)
Bag Types	Transparent, Gusseted, Handle, PE Inner (PP+PE), Perforated, Valve

## Transparent Bag

Transparent woven bags are made by directly stretching and weaving pure polypropylene raw materials without adding filler masterbatch. It has good transparency, flatness, and brightness. Transparent woven bags are made by directly stretching and weaving pure polypropylene raw materials without adding filler masterbatch. It has good transparency, flatness, and brightness. It is widely used in the packaging of agricultural products such as peanuts, rice, vegetables, and fruits.

Width	350mm-1000mm
Length	As the customers' requirements
Weight	55-160 gr/m <sup>2</sup>
Denier	600D-1500D
Color	All kinds of colors or As the customers' requirements
Top	Heat cut or hemmed
Printing	One side or both sides in multi-colors with film or non film
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Surface Dealing	Anti-slip or Plain
Packing	Optional (Bale Press Packing & Palletized Packing)
Bag Types	Transparent, Gusseted, Handle, PE Inner (PP+PE), Jumbo

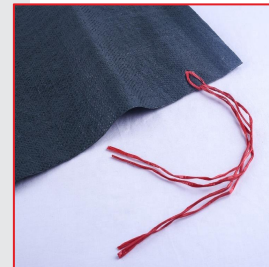

# PP WOVEN BAG

Quality Production At Specified Standards

## PP Woven Bags With Tie String

The container is made of 100% new PP material, added UV, high strength, used for storage and transportation of heavy-duty materials and products. These bags can be used in a variety of industries, such as chemicals, dye intermediates, pharmaceuticals, minerals, rubber, sugar and so on.

Width	350-1000mm
Length	Optional
Weight	55-160 gr/m <sup>2</sup>
Denier	600-1500D
Additives	Optional
Lamination	20-50 gr/m <sup>2</sup>
Cut	Cold Cutting
Weave	Optional
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Colour	Optional
Packing	Optional (Bale Press Packing & Palletized Packing)
Surface Dealing	Anti-slip or plain

## Post Bag For Air Parcel

Post Bag For Air Parcel on inorganic, organic matter has good corrosion resistance, in 110 degrees Celsius below, in a long time it has no effect on it on solvents, grease and so on has a strong chemical stability.

The most prominent difference of PP bag and ordinary plastic is non-toxic or tasteless. Let us rest assured, and the surface is clean, looks clean and sanitary, used to package food and so on do not have to worry so much, PP bag toughness is also better, more solid, it is also very convenient to use.

- Can be non-slip treatment;
- Can be hot or cold cut;
- Can be made m-fold or mid-seam/barrel;
- Can also provide translucent materials to improve product visibility.

## Kraft poly paper bag

Kraft Paper Bags laminated with polyethylene (PE) woven fabric or polypropylene (PP) woven fabric are highly durable and puncture resistant. They are suitable for loading and unloading bulk powder and granular materials during shipping; these bags are also widely used for heavy-duty packaging.

Width	As your request
Length	As your request
Weight	As your request
Denier	600D-1500D
Color	All kinds of colors or As the customers' requirements
Top	Heat cut or EZ - Open
Printing	One side or both sides in multi-colors with film or non film
Bottom Sewing	Single folded, Double folded, Single/ Double stitched, Bottom sewing with tape
Surface Dealing	Anti-slip or Plain
Packing	Optional (Bale Press Packing & Palletized Packing)
Bag Types	As your request

# Woven PP Fabric

## BAGKING

### Woven PP Fabric

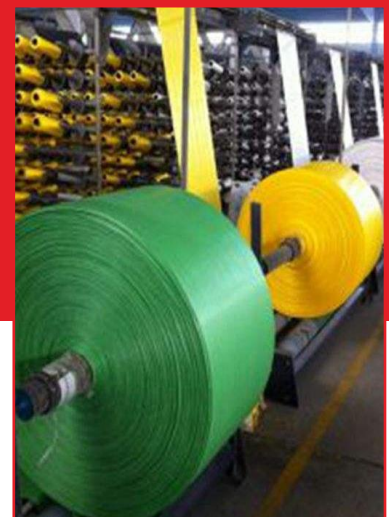

Some of the main uses for PP woven fabric rolls are: Bale wrap, pallet sheets, pallet lining, and various reinforcements. We can tailor make fabric according to your usage and specific needs.

Width	As your request
Length	Optional
Weight	As your request
Denier	Optional
Additives	As your request
Denier	600D to 1500D
Cutting	Heat /Cold cut,Wire seal,Ultrasonic heat seal
Printing	Normal printing or Bopp laminated
Weights/m <sup>2</sup>	Single or Double Fold, Single or Double Stitch
Colour	Optional
Packing	Optional (Bale Press Packing & Palletized Packing)

### Woven PP Fabric

Woven PP Fabrics are the preferred products, due to their resistance to heat, cold, humidity and all heavy conditions, to be used in rolls or cut pieces before apparel manufacturing process of the fabrics which are output of the weaving loom.

# Mesh bag

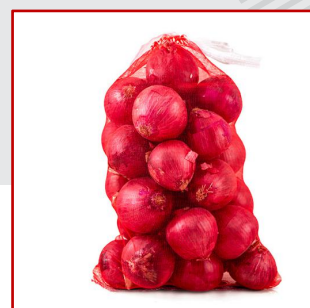

Mesh bags are mainly used in agriculture and livestock farming and are suitable for vegetables such as onions, garlic and so on. There is also a large mesh bag for straw, which is used to store hay for livestock in winter.

Width	35-100 cm
Length	Optional
Weight	55-160 gr/m <sup>2</sup>
Denier	Optional
Additives	Optional
Treat	UV treated or as the customers' requirement
Top	Heat cut or hemmed
Printing	One side or both sides in multi-colors with film or non film
Bottom Sewing	Single or Double Fold, Single or Double Stitch
Colour	Optional
Packing	Optional (Bale Press Packing & Palletized Packing)
Bag Types	Transparent, Gusseted, Handle, PE Inner (PP+PE), Perforated, Valve

## About this bag

- Breathable mesh: sustainable and viable
- Highly durable: products are durable and flexible/long lasting/protective
- Versatile: suitable for all types of fruit and vegetables
- Lightweight: easy to transport and efficient
- Instructions for use: can be used all year round / these can be used to store vegetables, fruit and other items / used to pack plant seeds

# BAG KING

## ● BIG BAGS (FIBC)

### Standard Big Bags

Standard big bags produced as laminated or non-laminated with circular or flat woven polypropylene fabric are used generally in safe transportation and storage of products weighing up to 2500kg.

### Cross Corner Big Bags

There are no side seams in the cross corner big bags produced from circular woven fabrics and they have loops stitched on the body of the main fabric, sometimes with added with vertical fabric reinforcement.

### ● Container Bags

Container bags are big bag type which enables transportation of products such as powder, granule, bulk, food without being soiled and in masses.

### ● Customieed Big Bags

Customized production big bags are special big bags which are produced in qualities and sizes demanded by the customers according to the types of products to be used in the big bags.

big bags produced in accordance with the directives of the United Nations are subjected to the following tests;

Top Lift Test

Drop Test

Topple Test

Righting Test

Tear Test

Stacking Test

There are 4 types of FIBC for dangerous goods made from woven polypropylene;

- 1 ● woven PP, uncoated fabric and without liner
- 2 ● woven PP, coated fabric and without liner woven
- 3 ● PP, uncoated fabric and with liner woven PP,
- 4 ● coated fabric and with liner
